

# Culinary Promenade

East Village Cooking School

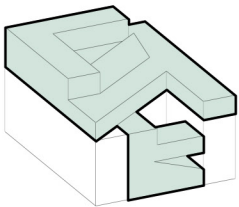

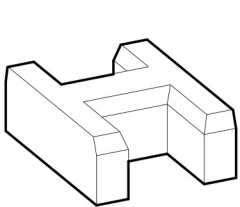

CORE II (A4002) | Columbia GSAPP | Spring 2020

Professor Christoph Kumpusch [ck2540@columbia.edu](mailto:ck2540@columbia.edu)

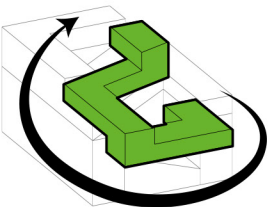

The rich processes involved in cooking can be used to teach foundational knowledge. Instead of cooking as a goal like in traditional culinary institutes, my school uses cooking as a means to education. Teaching physics by analyzing oven mechanics, biology by picking fruits in the greenhouse, and history by studying the cultural aspects of food. The architectural manifestation of this project is a design that is highly dynamic to reflect the unique approach to education, with spaces blending together, and intersections that create interstitial spaces needed for education.

Existing abandoned school at  
350 E 10th Street, East Village New York

Repurposing existing  
structure and  
programming new ones
